Malossi si riserva il diritto di apportare modifiche tecniche, di codice, di prezzo, qualora lo ritenesse necessario e non si assume alcuna responsabilità per eventuali errori tipografici e di stampa.

Prodotti riservati esclusivamente alle competizioni nei luoghi ad esse destinate secondo le disposizioni delle competenti autorità sportive. Decliniamo ogni responsabilità per l'uso improprio.

Malossi reserves the right to make technical and code modifications as well as to the quantity of multiple packages whenever it is considered necessary, and shall not accept liability for any typographic or printing errors.

Products to be used exclusively for racing in places specially designed for such activity according to the regulations of the competent sporting authorities. We accept no liability resulting from improper use.

BRAKE PADS

SPORT

Le Malossi Brake Pads SPORT sono pastiglie freno realizzate con materiale di attrito a base organica, completamente privo di amianto.
Questa linea di prodotti rappresenta l'eccellenza per la sostituzione delle pastiglie di primo equipaggiamento.
La mescola di queste pastiglie garantisce una buona durata, senza penalizzare l'efficienza frenante.
Con Brake Pads SPORT alle prestazioni eccellenti si affianca un'elevata modulabilità della frenata, che consente di arrestare il proprio veicolo con grande sicurezza e controllo in ogni condizione.

Malossi SPORT Brake Pads are made of organic-based friction material, totally asbestos-free.
This product range represents the excellent choice for replacing OEM pads.
The blend of these pads guarantees their long life, without penalizing braking efficiency.
Besides excellent performance, Brake Pads SPORT provide a fine brake modulation, thus allowing to stop the own vehicle with great safety and control in any condition.

MHR

Il materiale di attrito delle pastiglie Brake Pads MHR è realizzato con fibre a base completamente organica e assolutamente prive di amianto.
La mescola è stata studiata appositamente per l'uso agonistico e riduce al minimo l'effetto fading.
Le Brake Pads MHR raggiungono il punto di massima prestazione nel minor tempo possibile, mantenendo allo stesso tempo una perfetta costanza di rendimento e una esemplare modulabilità di frenata dal primo all'ultimo giro di una gara, condizione essenziale per l'uso in pista.
La mescola di queste pastiglie contiene elementi che impediscono al materiale di attrito di bruciare quando è sottoposto a forti sollecitazioni, come per esempio quelle che si vengono a creare durante una competizione!

The friction material of Brake Pads MHR is produced with completely organic-based and asbestos-free fibers.
The blend has been specifically formulated for racing use and reduces at most brake fade.
Brake Pads MHR achieve the best performance in the shortest time, thus keeping a perfect stable performance as well as an exemplary brake modulation from the first to the last lap of the race.
This is an essential condition for the use on the race track.
The blend of these pads contains elements which prevent the friction material from burning when subjected to stress, such as during a competition!

SYNT

Le pastiglie con materiale di attrito sinterizzato hanno il coefficiente di attrito più elevato in assoluto e per questo garantiscono spazi di arresto più ridotti con decelerazioni mozzafiato.
La loro peculiarità è la capacità di mantenere una costanza di rendimento indipendentemente dalla temperatura e dalle condizioni meteo.
Il materiale di attrito è ottenuto attraverso la sinterizzazione di polveri metalliche ed altri elementi a base di rame, da cui risulta un composto che esalta la potenza frenante senza penalizzare la durata.

Pads with sintered friction material have the highest friction coefficient and for this reason they guarantee shorter stopping distances with breathtaking decelerations.
Their peculiarity consists in being able to keep a stable performance regardless of temperature and weather conditions.
The friction material is obtained through a sintering process of metal dusts and other copper-based elements.
The result is a compound able to enhance the braking power without reducing the lifetime of the pads.

Omologazione

Brake Pads
Brake Pads MHR SYNT

Malossi si impegna ogni giorno per migliorare la qualità, le prestazioni e la sicurezza dei propri prodotti e in quest'ottica si colloca la proposta di una **gamma di pastiglie freno omologate**.
È molto importante per noi che la nostra clientela sia certa che le **Malossi Pads** e **Malossi Synt Pads** siano in linea con i rigidi standard imposti dall'omologazione **ECE R90** e possano essere utilizzate sui veicoli da strada in tutta Europa e in molti paesi del mondo.

Come si omologano le pastiglie Malossi?

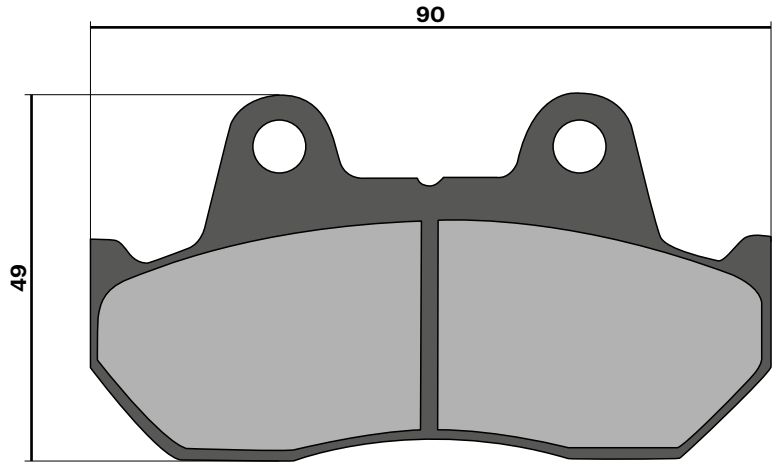

Per conseguire questa certificazione le Malossi Pads devono superare alcuni test su strada eseguiti sul veicolo a cui sono destinate le pastiglie.
Durante questi test l'efficienza è verificata attraverso una serie di frenate sia "a freddo" che sotto stress, per valutare la resistenza della pastiglia e la sua capacità frenante a diverse velocità.
Sono previste anche prove di sensibilità per valutare che variazione di pressione serve esercitare per ottenere lo stesso valore di decelerazione a tre velocità differenti.
Oltre ai test su strada, il materiale con cui sono realizzate le pastiglie viene sottoposto anche a prove di laboratorio come la resistenza alla compressione e al taglio.
Malossi ha ottenuto la certificazione **E/ECE/324-E/ECE/TRANS/505 Regulation No. 90** avvalendosi della collaborazione di Dekra, un autenico colosso nel settore delle certificazioni.
I test sui veicoli sono stati eseguiti dagli ispettori Dekra presso il complesso delle piste prova di Balocco (Balocco Proving Ground) e nel Centro Prove Dekra di Cinisello Balsamo, e **hanno superato quanto previsto dalla normativa ECE R90 con ampi margini!**

Homologation

Brake Pads
Brake Pads MHR SYNT

Every day Malossi undertakes to improve the quality, performance and safety of its products; the new range of **homologated brake pads** was designed to this purpose.
It is important for us to guarantee our customers that **Malossi Pads** and **Malossi Synt Pads** comply with the strict standards required by **ECE R90** homologation and that they can be used on road vehicles in all of europe and many countries in the world.
How do malossi pads get homologated?
In order to obtain this certification Malossi Pads must overcome some road tests on the vehicle for which they are intended.
These tests aim at checking their efficiency through a series of brakings, both sudden and under stress, in order to evaluate pad resistance and its braking capacity at different speeds.
Brake pads must be tested also for speed sensitivity with the aim of evaluating which pressure variation is necessary to exert, in order to obtain the same value of deceleration at three different speeds.
Besides road tests, the material of which pads are made undergoes laboratory tests such as compression and cut resistance.
Malossi obtained the certification based on **E/ECE/324-E/ECE/TRANS/505 Regulation No. 90** in co-operation with Dekra, an eminence in the field of certification services.
The tests on the vehicles have been performed by Dekra inspectors at Balocco Proving Ground and Dekra Test Center in Cinisello Balsamo, and **they passed the ECE R90 requirements by wide margin!**

BRAKE POWER DISC
WHOOP DISC

BRAKE POWER DISC

Concepiti per ottenere la massima prestazione possibile, **Malossi Brake Power Disc** rappresenta lo stato dell'arte nell'ambito racing. Niente promesse, solo sostanza. Tagliati al laser per rispettare le strettissime tolleranze di parallelismo e rugosità imposte dagli elevati standard Malossi per le superifici di attrito, i Brake Power Disc Malossi sono anche super-forati, per favorire il raffreddamento e assicurare una perfetta costanza di rendimento, soprattutto in condizioni di utilizzo estreme.

Caratteristiche tecniche

- Realizzati in acciaio Inox speciale, espressamente formulato e studiato per realizzare i Brake Power Disc, al fine di garantire:
- Altissima resistenza per ottenere dischi di piccolo spessore e quindi più leggeri.
- Assoluta resistenza alla corrosione, agli agenti atmosferici e all'usura.
- Elevato coefficiente di attrito per una straordinaria efficienza di frenatura ed una notevole progressività in frenata.

Designed to achieve the highest possible performance, **Malossi Brake Power Discs** represent the state of the art in racing. No promises, just facts. Laser cut to meet the strict tolerances of parallelism and roughness imposed by the high standards of Malossi for friction surfaces, the Brake Power Discs Malossi are also super-drilled for better cooling and ensure perfect consistency of performance, especially in extreme use conditions.

Technical features

- Made with special stainless steel expressly formulated and developed to create the Brake Power Discs, to ensure:
- High resistance, to achieve thinner and hence lighter discs.
- Absolute resistance to corrosion, atmospheric agents and wear.
- High friction coefficient to allow extraordinary braking efficiency and smooth brake Progression.

WHOOP DISC

Leggerissimi, inossidabili e indeformabili, i **Whoop Disc Malossi** sono studiati per un uso prolungato in qualsiasi condizione atmosferica e su qualsiasi tipo di percorso, grazie al loro disegno speciale che scarica acqua e fango con grande efficienza e garantisce una perfetta rasatura delle pastiglie. Abbinati alla gamma Brake Pads Malossi, i Whoop Disc sono in grado di garantire una frenata progressiva e sicura in tutte le circostanze.

Caratteristiche tecniche

- Realizzati in acciaio Inox, lavorati al laser, bonificati e rettificati.
- Profilo definito al CAD e calcolato per rasare completamente la superficie del materiale di attrito, scaricare le polveri, evacuare l'acqua ed il fango durante la frenata.
- Superficie di dissipazione del calore raddoppiata in grado di mantenere bassa la temperatura d'esercizio.

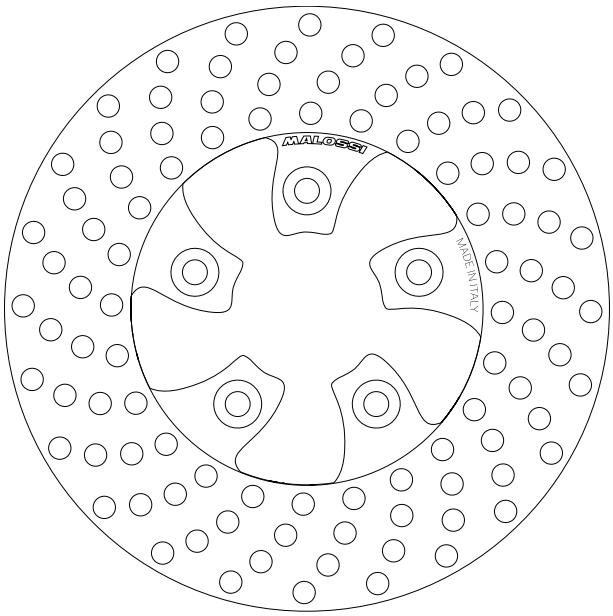

Lightweight, made of stainless steel and non-deformable, the **Malossi Whoop Discs** are designed for a prolonged use in all weather conditions and on any type of track, thanks to their special design that drains water and mud with great efficiency and provides a perfect evenly wear of pads. Matched to the Brake Pads range by Malossi, the Whoop Discs are able to ensure a progressive braking and safe in all circumstances.

Technical features

- Made with stainless steel, laser cut, hardened and surface machined.
- Profile designed using CAD to insure complete scraping of the brake pad, the elimination of brake dust, and the removal of water and mud during braking.
- Surface area doubled to lower the disk s working temperature.

BRAKE POWER

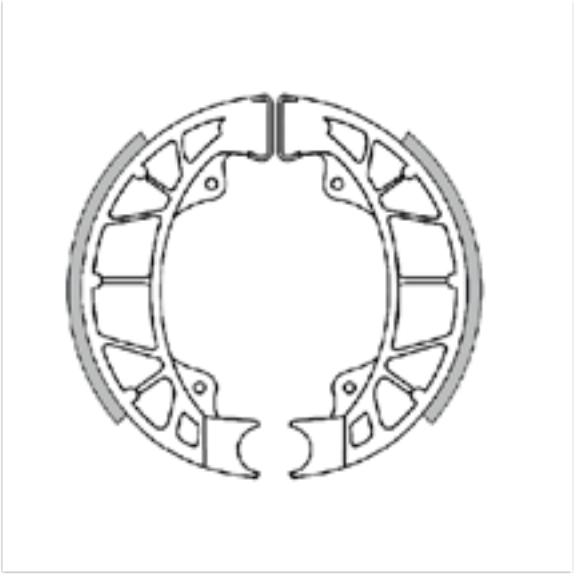

I **ceppi freno** della Malossi sono stati studiati per l'installazione su tutti i più importanti veicoli di produzione europea e giapponese.
Questi ceppi freno sono stati progettati e testati dai nostri tecnici per superare agevolmente gli stress imposti da un utilizzo esasperato e principalmente per mezzi da competizione che necessitano notevole decelerazioni e costanza di rendimento alle temperature più elevate.
Per questo i ceppi freno Malossi sono realizzati in lega speciale di alluminio al Magnesio con materiale d'attrito speciale esente da amianto in base alle nuove norme CEE.
Le nuove mescole del materiale d'attrito sono ecologiche ed offrono caratteristiche enormemente superiori alla media, garantendo una frenata modulare e progressiva, inferiori spazi di frenata e consumi chilometrici di materiale d'attrito estremamente limitati. I tagli obliqui per lo scarico delle polveri sono stati studiati e collaudati in quattro anni di competizioni degli scooter, concluse sempre con le vittorie dei team Malossi.

Malossi **brake shoes** have been perfected for the installation in the most important vehicles produced in Europe and Japan.
Our engineers designed and tested them to easily withstand the stresses due to extreme use and above all they designed them for racing machines which need higher decelerations and performance consistency at elevated operating temperatures.
For this reason Malossi Brake Power are made of a special aluminium-magnesium alloy and a special asbestos-free friction material, in compliance with new EEC regulations.
The new friction material mixtures are ecological and have considerably better characteristics than the average guaranteeing modulated and progressive braking, shorter stopping distances, and a very low kilometric consumption of the friction material. The oblique edges for exhausting dust have been studied and tested for over four years in scooter racing, always won by Team Malossi.
